### Pak Beng Hydro Dam Underway

The fast flowing river is being redirected to allow foundation works for the dam wall and substantial earthworks happening on both sides of the narrow canyon. This looks like it is all China funded with China branded earthmoving equipment and trucks all over.

Watching and taking photos and along came two working elephants at a fast walk pace.

Wonderful to see those working 'chang'; very nice pics Gary.

A happy rider is one who can enjoy an unexpected detour along the way.

Phil that is the foundation work underway for the dam wall for the Hydro plant. The Pak Beng bridge down river has work happening on either ends next to the ferry crossing.
